

Ubuntu-Linux Operating System
Disc as customized by the
eCommittee
for Indian Judiciary

ADVANCED COMPUTER FUNDAMENTALS

1. Computer System
2. Computer Hardware
3. Inside the Computer
4. Computer Memory & Storage
5. Computer Software
6. Computer Programming
7. Computer Virus
8. Computer Networking
9. Internet & Email
10. Computer Security

Computer Software

Computer Software

- What is a Software

Computer Software

- What is a Software
 - A software is a collection of computer programs

Computer Software

- What is a Software
 - A software is a collection of computer programs
- What is a Computer Program

Computer Software

- What is a Software
 - A software is a collection of computer programs
- What is a Computer Program
 - A Computer Program is a set of specific instructions to be executed by the computer to accomplish a specific task.

Computer Software

Computer Software

- Operating System

Computer Software

- Operating System
 - Operating System is the Software which works as an interface between the Computer and the User

Computer Software

- Operating System
 - Operating System is the Software which works as an interface between the Computer and the User
 - Windows, Linux, MacOS, Unix etc.

Computer Software

- Operating System
 - Operating System is the Software which works as an interface between the Computer and the User
 - Windows, Linux, MacOS, Unix etc.
- Application Software

Computer Software

- Operating System
 - Operating System is the Software which works as an interface between the Computer and the User
 - Windows, Linux, MacOS, Unix etc.
- Application Software
 - Application Software is the Computer Software which helps the user to accomplish specific tasks

Computer Software

- Operating System
 - Operating System is the Software which works as an interface between the Computer and the User
 - Windows, Linux, MacOS, Unix etc.
- Application Software
 - Application Software is the Computer Software which helps the user to accomplish specific tasks
 - Wordprocessors, Spreadsheet Programs, Media Players, Database Applications etc.
